## **DETAILED ACTION**

This Office Action is in response to the RCE filed 10 April 2006.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7 and 15-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1-7 and 15-22 disclose a density of the impurity element in the semiconductor decreases with the distance from the interface between the semiconductor and the transparent electrode. This limitation is new matter.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7 and 15-22 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
